PROFILE

As a versatile Full Stack Developer, I specialize in building scalable web applications through innovative technology stacks. My expertise includes advanced back-end development with Laravel, Symfony, and Express.js, complemented by proficient database management skills in MySQL and PostgreSQL. Additionally, I excel in front-end frameworks like Vue.js and Nuxt, delivering seamless and efficient full-stack solutions. Proven track record of transforming project requirements into intuitive and functional user interfaces through effective team collaboration. With a keen eye for detail and continuous learning, I stay ahead by exploring emerging technologies and trends. My problem-solving skills and commitment to best practices deliver high-quality solutions that drive business success.

SKILLS

Back-end Development: PHP, C#, Node.js, LAMP Stack

Front-end Development: JavaScript, HTML/CSS, TypeScript,

Databases: MySQL, PostgreSQL, SQL Server

Frameworks: Laravel, Symfony, ASP.NET MVC 5, Express.js

JavaScript Libraries/Frameworks: Vue.js, Nuxt.js, Node.js, jQuery, Chart.js

UI Frameworks: Bootstrap, Tailwind CSS

State Management: Vuex

Cloud Platforms: Supabase

Version Control: Git, GitHub

CMS: WordPress

API Development: RESTful APIs, API Platform

AI Integration: OpenAI API

Authentication: Magic SDK, Supabase Auth

DevOps & Containerization: Docker

Other skills: Responsive Web Development, UI/UX Design, Problem-Solving, Debugging skills

PROFESSIONAL EXPERIENCE

ACC Long Distance Medical Transport & Air Ambulance . Punta Gorda, FL . 10/2024 - Present

Full Stack Developer

Tech summary: PHP, Laravel, Bootstrap, MySQL, WordPress, Express.js, Magic SDK, LAMP Stack

- Developed and maintained a RESTful API using Laravel for a transportation services platform, improving dynamic scheduling, driver performance analytics, and seamless communication between drivers and dispatchers, while ensuring data handling and efficient performance.
- Built and maintained two WordPress websites for medical transportation services, leveraging PHP and JavaScript to enhance user experience, improve cross-device compatibility, and ensure responsive design.
- Customized and enhanced an existing driver hub application by integrating Magic SDK for secure, passwordless user authentication, optimizing database queries to improve data loading performance, implementing responsive Bootstrap design, and extending Express.js functionality to meet specific operational requirements.

Zertifika Latam . Panama City, Panama (Remote) . 10/2020 - 09/2023

Full Stack Developer

Tech summary: PHP, Laravel, Vue.js, Vuex, Bootstrap, TypeScript, MySQL, LAMP Stack

- Developed eSignature functionality using Vue.js and Signature Pad library, allowing users to draw, upload, and type signatures on any document while capturing screenshots with the webcam. Delivered secure document tracking and management workflows, optimizing the signing process and ensuring a seamless user experience.
- Built a financial system for short term emergency loans, using Laravel and Vue.js to create features such as a loan calculator, application review dashboard, and reporting tools, ensuring seamless loan management for users and administrators.
- Collaborated closely with design and back-end teams to deliver seven web applications on time, transforming layered design mockups (.psd, .fig, .png, .jpg) into high-quality, responsive HTML/CSS code while maintaining design fidelity and ensuring cross-browser compatibility.

Independent Consultant (Freelance) . Havana, Cuba (Remote) . 06/2015 - 09/2020

Full Stack Developer

Tech summary: PHP, Symfony, Laravel, API Platform, WordPress, Bootstrap, Vue.js, MySQL, LAMP Stack

- Designed and developed a dynamic classified advertisements platform using Laravel and Vue.js, implementing advanced search functionality, user authentication, and listing management systems, streamlining user engagement through responsive design and intuitive UI/UX.
- Implemented a RESTful API using Symfony and API Platform, delivering endpoints for inventory management, order processing, customer profiles, and product catalogs while ensuring secure data access through JWT authentication and role-based authorization.
- Developed a job marketplace platform using Symfony, featuring job posting management, candidate profiles, resume handling, and advanced search filters. Employers can create detailed listings, while job seekers can showcase their experience and track applications. The platform ensures a seamless recruitment experience with intuitive navigation, efficient hiring workflows, and privacy controls.
- Built a WordPress website for a tourism agency, incorporating custom PHP functionality to create tailored post types for tour packages and destinations. Additionally, I integrated the Redsys payment gateway for secure and efficient transaction processing and developed custom API endpoints for seamless third-party tour booking integrations.

Almacenes Universales S.A . Havana, Cuba . 09/2013 - 05/2015

Full Stack Developer

Tech summary: ASP.NET MVC 5, SQL Server, Bootstrap, jQuery, Chart.js

- Implemented a comprehensive issue-tracking system, streamlining transportation incident management using ASP.NET MVC 5 and SQL Server. Integrated dashboards with Chart.js to track issue trends, monitor resolution times, and identify recurring problems for process improvements. Collaborated closely with logistics teams to customize features that streamlined workflows and enhanced operational efficiency, ensuring the application delivered measurable business value.

SIDE PROJECTS

Magic-Auth-Wrapper . 11/2024 - 01/2025. [Github](#)

Tech summary: Node.js, Express.js, Magic SDK, Tailwind CSS

- Developed a starter template for integrating a passwordless authentication system using Magic SDK with Express.js for secure user login using one-time passwords (OTP) sent via email and SMS.

Next-Gen-School . 06/2024 - Present . [Github](#)

Tech summary: PHP, Laravel, OpenAI API, Nuxt, Tailwind CSS, MySQL, Docker

- Built an AI-powered learning app using Laravel, Nuxt.js, and the OpenAI API, enabling course content generation, dynamic quiz creation, and dashboards to showcase user progress and completed courses, resulting in streamlined course development workflow and comprehensive learning materials.
- Integrated Laravel Sanctum to secure API token-based authentication and Laravel Fortify to handle user registration and login, ensuring a seamless and secure experience for users in the learning app.

Spend-Trail . 11/2023 - 03/2024. [Github](#)

Tech summary: Mindee OCR API, Supabase, Nuxt, Bootstrap, TypeScript, PostgreSQL

- Successfully integrated Mindee OCR API to extract data from invoice and receipt images and store it in a Supabase PostgreSQL database while developing an image upload feature using Supabase Storage for secure and scalable cloud storage.
- Implemented Supabase Authentication with social providers like Google and GitHub to enable secure and convenient user login/signup experiences.

Education

BACHELOR'S DEGREE Software Engineering | 2008 - 2013 | Havana University of Technologies Jose Antonio Echeverria | Havana, Cuba
